

New Hampshire Cannabis Association

Manchester, NH — NH Cannabis Association, the state's leading trade group for the cannabis industry, is proud to announce the appointment of former Representative Timothy T. Egan (D) of Sugar Hill as inaugural chair of the NHCANN Board of Advisors. Egan, a two-term House Rep. for Grafton District #2, takes on the role to develop the NHCANN industry presence and legislative engagement. As outgoing chair of the NH House Democratic Cannabis Caucus, Egan will focus on pending commercial and medicinal legislation for 2023.

In accepting the role, Egan said, "With 75% of Granite Staters approving of adult cannabis use and 21 states legalized and commercialized, the time for legal cannabis in NH is now. We are losing revenue to other New England states, ignoring economic development opportunities, and potentially limiting our tourism industry. Live Free Or Die? It's time to prove it with cannabis."

The forward-thinking legalization and commercialization legislation was created by a coalition of community leaders: NHCANN, the Marijuana Policy Project, ACLU of NH, Americans for Prosperity of NH, and Prime Alternative Treatment Centers with input from New Futures and NH School Funding Fairness Project.

Egan brings diverse experience to help lead the cannabis initiative in NH. He currently serves as part-time faculty for the Cannabis Studies Certification Program at Vermont State University. He produced the 2019 Cannabis Sustainability Conference in Worcester, MA, and served as digital media coordinating producer for the Denver-based Cannabis Certification Council from 2019-2021. He has been a media consultant for both the Business & Industry Association of NH and Passumpsic Bank since 2020 and a business representative on the NH Canada Trade Council since 2010.

NHCANN Executive Director Daryl Eames said, "We are currently recruiting volunteers and [individual](#) and [corporate sponsors](#) to support our activities throughout the state of New Hampshire. There's not be a better choice than Timothy Egan to help us grow our organization's board and move our state forward in the cannabis industry. Contact him if you're interested in getting involved in a key agricultural, retail and tourism sector."

About NH Cannabis Association

Headquartered in Manchester, NH, the NH Cannabis Association connects, organizes, educates and supports communities, entrepreneurs, advocates, legislators and investors interested in participating in or supporting the local cannabis industry and the move toward legalizing recreational use in the state. The for-profit LLC accomplishes its mission through networking groups and events, conferences, discussion, content, media and local outreach.
